Location: São Paulo - SP, Brazil (Remote Available)

PROFESSIONAL SUMMARY

Senior Software Engineer with over 7 years of solid experience in Information Technology, specializing in the Front-End ecosystem (with deep expertise in Angular) and a strong background in modern Back-End architectures (Java/ Spring Boot, Node.js). Proven track record in designing and implementing highly scalable structures, including Micro Front-Ends (MFE), Microservices, BFF (Backend-For-Frontend) patterns, and security meshes. Active experience in digital transformation processes, legacy system migrations, cloud-based infrastructure automation (AWS, Azure), and advanced DevOps/CI/CD and automated testing practices. Focused on delivering robust solutions that directly impact business results, working under agile methodologies (Scrum, Kanban).

TECHNICAL SKILLS

Front-End:	Angular (v13 to v17+), Micro Front-Ends (MFE), Single Page Applications (SPA), TypeScript, JavaScript, Bootstrap, Angular Material, Flame.
Back-End & API:	Java (Spring Boot), Node.js (Express), RESTful APIs, Microservices Architecture, BFF (Backend-For-Frontend), API Gateways / Security Middlewares, JUnit, Mockito.
DevOps & Cloud:	Docker, Docker Compose, Kubernetes, AWS, Azure, Ansible, CI/CD (Jenkins, GitLab CI), SonarQube, Version Control (Git/GitHub/GitLab).
Quality & Testing:	Unit and End-to-End (E2E) automated testing with Jasmine, Karma, and Cypress.
Databases:	PostgreSQL, Oracle, SQL Server, MongoDB, MariaDB.
Monitoring:	Zabbix, Grafana, GLPI, OTRS, Nextcloud.

PROFESSIONAL EXPERIENCE

Software Development Specialist (Full-Stack) <i>Capgemini</i>	May 2026 – Present
- Technical leadership in the strategic migration of legacy corporate systems to the latest and high-performance versions of Angular and Java. - Designed and implemented modern and secure architectures using Microservices, Micro Front-Ends (MFE), and BFF (Backend-For-Frontend) patterns. - Developed and integrated APIs and security middleware layers structured for data protection and critical data integrity.	
Senior Full-Stack Developer <i>CWI Software</i>	August 2025 – April 2026
Focused on the client Banco Votorantim, working on the conception and creation of a robust Design System, unifying the UI/UX experience and scalability of digital products.	

- Responsible for advanced versioning of complex Angular applications and end-to-end integration architecture.
- Developed and coupled modern Front-End applications directly linked to BFF layers to optimize performance and data consumption.

Principal / Senior Front-End Developer

January 2023 – August 2025

Nexmuv Tecnologia

- Strategically allocated to the major client **Valid**, acting as the principal Front-End developer of a central ecosystem with direct financial and operational impact on the company.
- Successfully coordinated and executed the migration of a highly complex enterprise application from Angular 13 to Angular 16.
- Implemented a robust culture of automated testing and quality, increasing coverage through Jasmine, Karma, and Cypress.
- Structured automated CI/CD pipelines via Jenkins and conducted code quality and security analysis using SonarQube.

Senior Software Engineer

August 2022 – January 2023

SCOND

- Developed scalable Front-End ecosystems under advanced concepts of Micro Front-Ends (MFE), Single Page Applications (SPA), SOLID patterns, and Clean Code using Angular and Angular Material.
- Created resilient APIs and high-performance microservices in Java architecture using the Spring Boot framework.
- Wrote and maintained end-to-end unit tests for Front and Back-End using tools like Karma, Jasmine, JUnit, and Mockito in a PostgreSQL environment.

Mid-Level Software Developer

December 2021 – July 2022

Santander

- Developed critical web solutions for the international financial sector using Angular, Bootstrap, and custom components.
- Created stable and high-performance corporate APIs based on the Node.js (Express) ecosystem.
- Designed highly resilient and customizable engines for full automation of internal process workflows in the technology area.
- Worked with and performed complex manipulation of relational and non-relational databases (Oracle, SQL Server, PostgreSQL, MongoDB).

Junior Software Developer

December 2020 – December 2021

Santander Tecnologia

- Developed modules and integrations via Micro Front-Ends and SPAs using agile and GIT best practices.
- Co-developed cross-platform Back-End logic using Java (Spring Boot) and Node.js.
- Implemented unit testing routines and automations supporting Jenkins and Kanban pipelines.

Junior & Trainee Support Analyst

February 2019 – November 2020

HS Prevent Ltda

- Provided specialized L1, L2, and L3 support for physical and cloud infrastructure (corporate Linux and Windows servers).
- Automated internal IT processes, integrated data flows via REST API, and performed preventive maintenance on diverse databases.

- Developed initial structured tests, performed code versioning, and actively maintained the technological asset inventory.

LANGUAGES

Portuguese: Native / Fluent

English: Advanced (Technical
Fluency)

Spanish: Basic

EDUCATION & CERTIFICATIONS

- **Ongoing Specialization:** Software Development focused on Advanced Front-End (Angular)
- **Additional Courses:** Agile-Scrum Principles | DevOps Culture and Practices | Docker and Docker Compose Fundamentals | Automation with Ansible | Advanced Programming Logic
